

## Campaign Platform

---

Hello, my name is Sarah Hallgren, and I am running for a position on the CSI Board of Directors. My goal for this position is to advocate for you, my fellow students, to preserve the services and events that we have come to love. Here at Conestoga, our diverse and thriving community deserves to have opportunities to show off our best selves and our cultures while developing new skills and ultimately having fun. We all win when the student wins.

During my time on the board, I plan to push for better supports for new and returning students through options like expanded guidance events and mentorship opportunities. Finding a way to advance our existing well-being and success offering will be a high priority as providing students with a time, space or activity to blow off steam and connect with others in the community helps make our student body stronger.

I will also work to prioritize improvements and expansion of our food and hospitality offerings. While the ongoing work to revitalize our cafeteria here at Doon is a great start, bringing in additional food vendors or food-based events to support students looking for additional variety is one of my goals. By opening event tables for more local vendors and food markets, we can work together to increase accessibility to healthy food options from around the world.

Speaking of accessibility, my last goal of running for this position is improve availability and awareness of the mental-health services and supports offered by Conestoga. We are all here to succeed and our community supports are ready for anyone who needs them. Remember, we all win when the student wins. Thank you!
